Founded in 1985, **VR Industries, Inc.** is a full service electronic contract manufacturer specializing in printed circuit board assembly (PCBA), electromechanical system integration (box builds), and testing. We pride ourselves in bringing our customers' most complex designs from drawings to real life. We maintain flexibility in our operations to support our customers most critical program/product requirements.

Core Competencies

Printed Circuit Board Assembly (PCBA):

- Surface Mount Technology (SMT), thru-hole selective soldering, Automated Optical Inspection (AOI), and x-ray services

Electromechanical Assembly (Box Build):

- Integration of chassis, power supplies, cabling, and PCBAs with rigorous system testing and burn-in services for complex assemblies

Supply Chain Management:

- Counterfeit component prevention and Lot/Date Code traceability built into our processes

Program Management:

- Dedicated program management professionals manage your program from quote to full scale production

Differentiators

End-to-End Solutions:

- We provide seamless support from prototyping and NPI to full-scale production, ensuring a tailored and integrated manufacturing partnership.

Dedicated Production Cells:

- Our dedicated production cells allow for streamlined workflows and superior quality to meet unique manufacturing needs.

Technical Expertise:

- Our team enhances manufacturability, accelerates time-to-market, and ensures compliance through close collaboration with clients.

Supply Chain Resilience:

- With multiple SMT and Thru-Hole lines, comprehensive supply chain programs, and multiple long time supplier relations, we are able to keep production operational at all times.

Quality-Driven Processes

- We exceed reliability standards with rigorous quality protocols (ISO9001, ISO13485, UL/ETL/Intertek Compliance) and continuous improvement practices.

Customer-Centric Approach:

- Our flexible solutions and responsive communication foster strategic partnerships and long-term success.

Past Performance

- Underwater Vehicle Manufacturing
- SONAR System Subassemblies
- Critical Communications Equipment
- Aircraft Altimeter PCB Assembly and Box Build
- Chemical, Biological, Explosive Detection System CCAs
